

Double-coated adhesive tape with easy removal and strong adhesive properties

No.5000NS

www.marianinc.com
1-800-773-0062

Outline

Nitto No.5000NS is a double-coated adhesive tape consisting of a strong, flexible non-woven fabric impregnated with acrylic adhesive that is applicable to a wide variety of substrates. No. 5000NS offers high tensile strength so it doesn't tear when peeled and leaves minimal adhesive residue on the substrate to which it was applied even if it remains applied for a long time. The tape can be re-peeled and is ideally suited for applications that require recycling.

Structure

Double release liner type, "No.5000NSWH" is also available.

* "Non-woven fabric" is classified under a law called Customs Act of Fixed Rate Chapter 48 "Paper and paperboard; articles of paper pulp, of paper or of paperboard".

Features

- Tape is strong so it doesn't tear when peeled, thereby making it easier to work with.
- Leaves minimal adhesive residue; can be re-peeled.
- Offers wide range of usage and service temperatures as well as superior repulsion properties.
- 6 restricted substances by RoHS are not contained.
- No.5000NS, No.5000NSU & No.5000NSWH are UL approved products. [UL File No. MH13557]
[The appearance and properties of both No.5000NSU and No.5000NS are identical.]

Applications

- Bonding of metal plates, plastic plates and foam
- Bonding of cushioning and sealing materials in:
Printers, Copiers, Televisions, Other office equipment and home appliances.
- Applications requiring re-peeling

Sizes

Tape thickness (mm)	Width (mm)	Length (M)
0.16	3-1, 200	50

Precautions when using

- Remove all oil, moisture and dirt from the surface of the substrate before applying.
- Since the tape is pressure-sensitive adhesive, be sure to apply enough pressure with a roller or press when applying. Otherwise it might be affected to its properties and appearance.
- The tape may not adhere well to extremely uneven or distorted surfaces. Enough Leveling off the surface should be required before applying.
- It takes certain time to get full adhesive strength after applying, keep away the tape from any stress for a several hours after applying.

Precautions when storing

- Please be sure to keep the tape in its box when not using.
- Please keep in a cool and dark place away from direct sunlight.

Safety precautions

 WARNING
<ul style="list-style-type: none">● Make sure the product is suitable for the application (objective and conditions) before attempting to use. The tape may come off depending on the substrate to which it is applied or conditions under which it is applied.● Use in combination with another method of joining if there is possibility of an accident.
