

## SURFACE PROTECTION FILM FOR PLASTIC MOLDED COVER ON ALARM SYSTEM CONTROL MODULE

**CHALLENGE:** Customer who manufactured molded plastic piece for alarm system needed a cling film material that would adhere to their molded part and act as the alarm system control module display cover

*Representation of surface protection material with pull tab*

### **MATERIAL: 3M™ 2105C Low-Tack Protective Tape**

- Transparent in color
- Adhered to specific plastic material used on customer's product
- Removed easily without leaving residue
- Allowed adequate level of protection for alarm system display

### **SOLUTION: Custom Die-Cut Surface Protection Tape**

- Parts provided kiss-cut to liner
- Pull-tabs were added for easy removal and efficient assembly by customer
