

COMPRESSION MOLDED RUBBER PARTS

Compression molded rubber parts are manufactured in custom shapes holding tolerances within 0.1mm. This manufacturing method is suitable for complex components needed at high volumes. Compression molded rubber parts are highly durable, flexible, and also heat resistant. Contact Marian to source your compression molded rubber components.

Precision **COMPRESSION MOLDED COMPONENTS**

MATERIALS

- Silicone Rubber
- Fluorosilicone
- Additive electrically conductive compounds
- With or without PSA

WHY MARIAN?

- Extensive Application Knowledge
- Global Support, Local Solutions
- Tight Tolerances
- Quick Response Times

APPLICATIONS

- Sealing
- Insulation
- Slip Resisting
- Wear Resisting

COMMON MARKETS

- Automotive Electronics
- High Speed Trains
- Computers
- Hand-held Electronics
- Medical Electronic Devices

A global leader in providing precision die-cut component parts composed of thin flexible materials. We understand that every component plays a critical role in the performance of your device. Our sales and engineering teams are strategically deployed throughout the North America, Asia, and Europe to support material selection, design, and logistics decisions.
