

SCREEN PRINTING AND GRAPHICS

ADVANTAGES OF SILK SCREEN PRINTING

QUANTITY

Large runs of identical graphics can be printed less expensively by screen printing as compared to digital processes. The larger the volume of the run, the more cost-effective screen printing becomes.

PRINT QUALITY

Screen printing generates better print quality. Small text and fine lines are good examples of this. Minute detail and precision are better able to be controlled over the course of the manufacturing run of large quantities.

DURABILITY

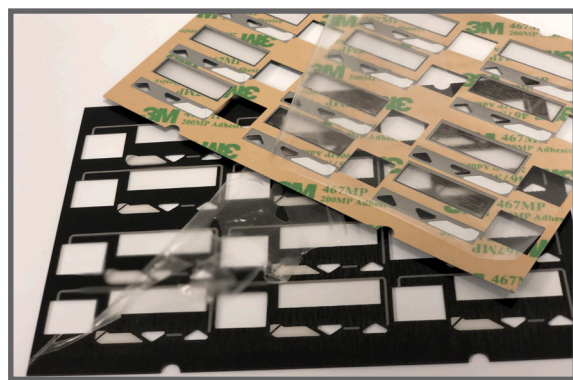

Screen printing creates more durable, long-lasting products. Inks are applied in heavier, thicker layers for more vibrant and brilliant colors. Overlays are often “back printed” or “printed on the sub-surface” for added durability.

Marian Screen Printing and Graphics Capabilities

CAPABILITIES

- Precise **color matching** system to produce exact PMS codes
- **First and second surface** screen printing
- Graphic **overlays**
- Dead-front graphic overlays
- Back-lit specialty overlays
- Screen printing and heat-cure of **conductive inks**
- Screen printing of **selective textured surfaces**
- **UV-cured spot** and **four-color process** works on most substrates
- Selective **adhesive lamination**
- Custom **precision die-cutting**: rotary, flatbed, laser, water-jet, and plotter cutting
- Flatbed **digital printing**

SUBSTRATES

Vinyl • Polyester • Metal plates
Specialty Foams • Polycarbonate
Light diffusing films • Anti-microbial films

COMMON APPLICATIONS

- Specialty labels: ideal for automotive, aerospace, and medical industry
- Computers and electronics
- Nameplates
- Panel Overlays for the telecommunications industry, and electronic devices

Marian graphic services are provided out of our **Marian Mexico facility in El Paso, Texas**. Marian Mexico is an ISO 9001 and ISO 14001 certified manufacturer that also offers converting capabilities including rotary and flatbed die cutting, slitting, laminating, and laser cutting of thin materials. Marian Mexico has over 30 years of experience producing high quality industrial and commercial screen printed products.
